

Business Majors:

In order to understand your Math placement scores and placement into your first semester math course, please follow instructions below.

1. Take your math placement score and multiply by 10
2. Then add your math SAT

Results:

If the score is greater than 1280 you will be placed into MTH 103 Finite Math which is your college level math course required of all business majors in Fall 2008.

If the score is less than 1280, you will be required to take MTH 100 in the Fall 2008 semester. This course is a preparatory math course which receives **NO** college credit. If you wish to remediate over the summer to waive this requirement, you **must** enroll in a basic algebra course over the summer at either UMass Dartmouth or a college closer to home. If the course is completed successfully you will be placed into MTH 103 in the fall.

Once the course is completed successfully, you should mail the grade report to:
