

VPN setup on the iPhone and iPod Touch*

Tap settings>Wi-Fi

Turn WiFi ON and choose UMASSD

Tap back to Settings

Tap General>Network>VPN>Settings>

PPTP Server: 134.88.252.20

Account: <umd username> ex: u_reilly

RSA SecurID: OFF

Password: <enter your VPN password>

Encryption Level: Auto

Send all traffic: ON

Proxy: Auto>Tap SAVE

Turn VPN ON

It will authenticate and report “connected” and show a timer once it is working.

* Please note that VPN is available on all iPhones, but only iPod Touch's with firmware 1.1.3 & purchased “January application upgrade” or iPod Touch's that were bought after January 2008.
