

VPN setup on Windows Mobile

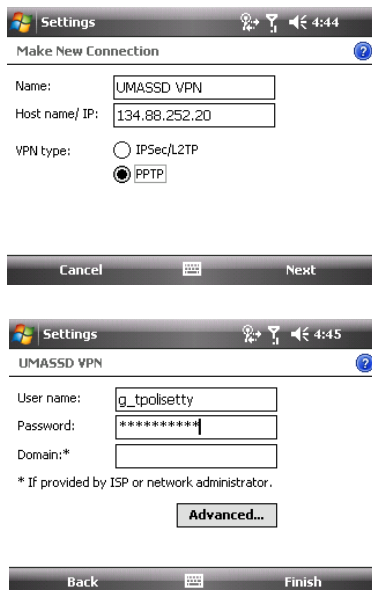

After you connect to the UMassD wireless access point you will need to setup the VPN connection and also register your hardware address on the UMass network

From the Start menu and select Settings

Then select Connections

Select Add new VPN connection

Enter UMassD VPN for the name
For IP put 134.88.252.20 and click Next

Please enter your VPN username and password
If you don't have or don't know your VPN username and password please go to

Leave the Domain blank and click Finish
