Guidelines for BMEBT graduate student occupancy in TEX106

Textiles room 106 is designated office space for graduate students in the interdisciplinary BMEBT doctoral program. Students may also be located in department laboratory and/or office space depending on availability and supervisor preference. There are approximately twenty (20) desk spaces for students in TEX106. The room also has a foyer for informal discussions, internet access, and workstations for printers and other accessories. All students assigned to TEX106 must be in good academic standing (GPA ≥ 3.00) and making satisfactory progress toward degree completion. The following is the priority order of occupancy:

1. Research Assistants sponsored by faculty
2. Graduate Students with a distinguished scholarship or fellowship
3. Graduate Students with a complete scholarship for one year
4. Graduate Student with tuition & fee waiver (GRE score can be used for rating)
5. Postdoctoral Scholar (a maximum of one or two desks may be available after students have been placed)

Mixing students from different majors and program stage will also be considered in the space assignments.

Protocol
TEX 106 is a designated study area and should be used for academic purposes only. Students should not leave anything valuable (e.g., computer) in their work space or anything confidential upon leaving for the day. The term of occupancy of each student assigned space will be specified, i.e., academic year, summer, one year, two years, etc.

TEX 106 Key Controls
- Key requests should be signed by the BMEBT co-directors, Dr. Bromage or Dr. Chalivendra, and then forwarded to Dion326 for signature by the dean.
- Students will not be certified for graduation unless proof is shown that the key has been returned to facilities.
