

Overview

This FAQ addresses two common Finance Mobius user questions when using the Internet Explorer browser.

How should I respond to the Security warnings I get when logging into Mobius?

When presented with the following pop-up message, which speaks to receiving only secured content, click the **NO** button, as you will want to receive all the content.

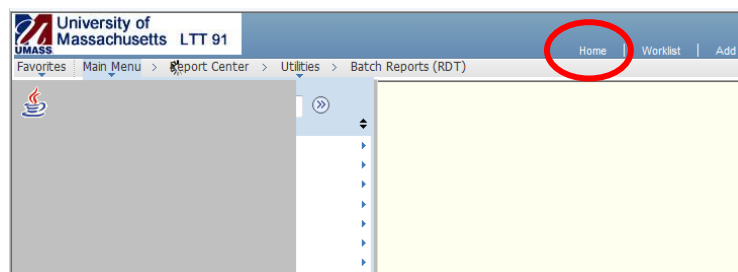

First time users will be presented with an additional pop-up message and should click the **YES** button:

How do I return to the Finance Navigation menu once I've logged into Mobius?

Once you are viewing Mobius, you will find the Finance navigation menu gets hidden behind the Mobius Java Menu. When you are ready to return to the Finance navigation menu, click the **Home** link.

For further information regarding Mobius, please call 508-999-8085.
