During May 2012, undergraduate and graduate students who were completing their degrees during the 2011-2012 academic year (AY) were asked to participate in a survey about their employment and educational plans following graduation (note: Law students were excluded because the Law School has specific standards for collecting these data). Graduating students were asked to participate in the survey at the campus bookstore as they picked up their caps and gowns for graduation ceremonies. Overall, 933 confirmed undergraduate degree earners responded to the survey (an approximate 75% response rate) and 169 confirmed graduate degree earners responded to the survey (an approximate 43% response rate). This brief details the principal findings from the survey (note: responses are based on the number of degree earners responding to the relevant survey items).
