

Economics - Healthcare Services Administration

• Major, BA

The Economics – Healthcare Services Administration bachelor's degree prepares students for careers planning, directing, and coordinating medical and wellness services. This degree is a great option for healthcare professionals with an associate's degree who want to advance their careers as managers or supervisors. The program is also well suited to students looking to work in the healthcare industry with a focus on operations, administration, and management rather than the science-focused aspects of this profession.

Healthcare administration professionals make decisions every day that help improve the lives of their patients. They are often responsible for managing health records, communicating new policies, coordinating with doctors and nurses, and ensuring compliance with healthcare laws and regulations. They work closely with medical staff to positively impact patient care.
