- Graduation rates are displayed in braces { } and are included in the retention rates.

- Cohort data is for first-time, full-time matriculated freshmen with no previous college credits in their initial semester.

- Once a retention cohort is established, it remains the same throughout the report cycle; no students are added or subtracted from the original cohort.

- Students called to military activation or deceased are deducted from the denominator when calculating rates. All cohorts (2011-2021) had exemptions.
