- Graduation rates are displayed in braces { } and are included in the retention rates.
- Cohort data is for first-time, full-time matriculated freshmen with no previous college credits in their initial semester.
- Once a retention cohort is established, it remains the same throughout the report cycle; no students are added or subtracted from the original cohort.
- Students called to military activation or deceased are deducted from the denominator when calculating rates. All cohorts (2012-2022) had exemptions.
