ANNUAL REPORT FY2022

KAPUT CENTER FOR RESEARCH AND INNOVATION IN STEM EDUCATION

JULY 31, 2022
Foreword

All Academic Institutes and Centers at UMass Dartmouth are required to prepare an annual report for the fiscal year just completed, and this report fulfills this requirement for FY22.

UNIVERSITY OF MASSACHUSETTS DARTMOUTH
KAPUT CENTER FOR RESEARCH AND INNOVATION IN
STEM EDUCATION

The Kaput Center for Research and Innovation in STEM Education is an interdisciplinary University Research Center that conducts innovative research in the teaching and learning of mathematics in all educational contexts. It is an academic Center located administratively with the School of Education in the College of Arts & Sciences.

Chandra Orrill, Ph.D. – Director

EXECUTIVE BOARD AT END OF FY22

**Mission**

The Kaput Center for Research and Innovation in STEM Education at the University of Massachusetts Dartmouth was established on March 1st, 2007. The Center was established in the spirit and vision of James J. Kaput, whose innovative thinking and leadership inspired many in the field of mathematics education. The purpose of this Center is to provide a focus and support for sustained investigation of foundational issues in the field of STEM education, issues that will be chosen to enhance and deepen ongoing research by its members and associates. The Center is an interdisciplinary research unit where fundamental problems in STEM education are studied, discussed and analyzed through conferences, interdisciplinary colloquium series, basic research and development, commissioned reports, and think-tank meetings.

This document reports the progress toward the fulfillment of this mission for the period ending July 31, 2022, which is Fiscal Year 2022. This document was prepared by Dr. Chandra Orrill, Director of the Center with support from Kimberly Welty, Grant Support Specialist.

Introduction

The Kaput Center for Research and Innovation in STEM Education at the University of Massachusetts Dartmouth (hereon called the “Kaput Center”) was founded by Professors Blanton, Hegedus and Moreno-Armella of the Department of Mathematics. The Kaput Center grew out of Professor Jim Kaput’s aim of democratizing mathematics for all learners.

President Jack Wilson approved its establishment on February 14th, 2007 and its was officially established by Dr. Anthony Garro, Provost of the University of Massachusetts Dartmouth, on March 1st, 2007.

Dr. Stephen Hegedus, Professor in the Department of Mathematics, was appointed the Center’s first Director by Provost Garro and Chancellor MacCormack.

During the initial period of its establishment (March – June of FY07) the Director and the founding faculty established an Executive Board and External Advisory Board. Projects of the Mathematics Education faculty were transferred to the Center and an agenda for the operation and events of the Center for the upcoming years was established.

In 2014, Professor Hegedus resigned from UMass Dartmouth, leaving the Kaput Center in the hands of Professors Goodman, Güçler, and Orrill serving as Interim Directors while a permanent director was sought. The search for a permanent director for the Kaput Center in FY 2015 was not successful, thus the leadership structure remained the same for FY2016. In FY2017, Professor Walter Stroup joined the leadership team and Professor Goodman stepped into the role of Chairperson of the Executive Board without additional duties. At the end of FY2017, an internal search was conducted and Professor Chandra Orrill was named the Director of the Kaput Center effective July 1, 2017. Professor Goodman continued serving in his capacity as Chairperson of the Board. Professors Orrill and Goodman resigned from their respective positions in July 2020. At that time, the Kaput Center was put on hiatus because of the limitations of trying to operate during the COVID shutdown. In September 2021, Dr. Orrill was reinstated as the director of the Kaput Center.

This report documents the ongoing work of the Kaput Center through FY2022.
Directors’ End-of-Year Report FY2022

Thank you for reading this annual report of the work of the Kaput Center for Research & Innovation in STEM Education. Much of FY22 was spent trying to reopen a Center that relies on its ability to connect with people at a time when they ways in which we connect are changing. We pivoted from our traditional approaches to meet the challenges of the time and learned a lot along the way. We were able to offer four colloquia this year, all virtually. We believe this allowed us to grow our reach while ensuring our stakeholders stayed healthy. We have also begun to plan STEM4Girls with a planned implementation date of October 1, 2022.

In FY 2022, Dr. Kayumova and I, along with Dr. Pratim Sengupta from the University of Calgary, began work on an EAGER grant from the National Science Foundation focused on cybersecurity and artificial intelligence in middle school. This is a small, exploratory grant that will result in insights about what middle school students do know about these areas, what they should know about them, and how we might be able to support their learning. Also in FY 2022, I was awarded an NSF grant to continue my prior work around using technology and playful approaches to engage mathematics teachers in learning about proportions and, now, fractions. Along with my colleagues, Dr. Rachael Brown at Penn State Abington and Dr. Allan Cohen at the University of Georgia, I will be expanding the scope of the PD, exploring how to support teachers in better connecting their learning to their teaching, and considering innovative ways to use classroom discussion as an assessment tool rather than relying on traditional tests.

We added three new Executive Board Members in FY22. Dr. Jay Wang from the Physics Department joined the board, thus expanding the campus representation on the Board. We were also joined by Dr. Karen Chang, a Chemistry Instructor at the Naval Academy Preparatory School and Dr. James Burke, an Engineering and Technology Teacher at Somerset Berkely Regional High School. With the addition of these three Executive Board members, we reaffirm our commitment to STEM more broadly. We also note that Dr. Burke worked for Dr. Kaput for many years on the SimCalc project and welcome his institutional memory to the Board.

The Kaput Center began its periodic review in FY22. The review should conclude in Fall 2022. This review will provide us with critical feedback on our work toward are mission and toward the university’s goals.

As always, the Kaput Center is a reflection of its people. As such, the STEMester in Review continues our tradition of having a variety of authors share their insights about events that happened this year.

Chandra Orrill  
Director
Kaput Center Infrastructure

Executive Board & Duties

The Executive Board consists of the Director of the Kaput Center, ex-officio, and no more than fifteen other individuals who shall be faculty members at an accredited institution of higher education; qualified professional practitioners with a documented record of scholarship or professional experience in education or educational policy, particularly, but not constrained to, STEM education research; or drawn from positions of leadership in the public, non-profit, and private sectors. The Director will invite and accept nominations for members of the Executive Board for review by the Executive Board. All members of the Executive Board agree to execute the mission of the center in collaboration with other Executive Board members and abide by the policy on center operations. A full list of members will always be displayed in the Kaput Center and included in the Annual Report.

The Executive Board convenes quarterly. The Director of the Kaput Center must notify all members of the Executive Board of the time, date, and place of all quarterly meetings at least one week prior to said meetings. A simple majority of the Executive Board shall constitute a quorum. Meetings are run subject to Robert’s Rules of Order. The Provost and the Chancellor of the University of Massachusetts Dartmouth as well as the Dean of the College of Arts and Sciences, can attend all Executive Board Meetings, although they are not members of the Executive Board.

The Executive Board exercise the following powers and authority:

- to review the Director’s quarterly update on research projects, service agreements, sponsored research agreements, and other activities,
- to review the Director’s quarterly statement of the budget for the Center and to make recommendations for expenditures and encumbrances from the budget,
- to approve or reject nominations of individuals for appointment to the Center as Research Associates or Visting Research Associates,
- to approve or reject nominations of individuals for appointment to the Executive Board,
- to approve or reject the Director’s recommendations for creating or discontinuing functional Divisions of the Kaput Center,
- to approve or reject the Director’s nominations of individuals for the appointment and removal of Heads of Divisions,
- to review, recommend, and approve any policies governing the Center’s operations as specified in the Mission Statement and By-Laws,
- to approve or amend the Director’s proposed annual report, financial statement, and proposed budget before it is submitted to the Provost or other officers of the University,
- to approve all recommendations from standing committees of the Executive Board,
- to advise and assist with graduate student recruitment strategies.

A simple majority of those members present and voting shall be sufficient to grant or withhold the approval of the Executive Board on all matters, except as specified elsewhere in the Mission Statement and By-Laws. Membership is for three (3) years and renewable.
**Advisory Board & Duties**

The Kaput Center is linked to the wider community through an Advisory Board. The Advisory Board shall be composed of individuals, appointed by the Director in consultation with the Executive Board, who are drawn from positions of leadership in the public, non-profit, and private sectors. The Board will assist in setting the Center’s research agenda and in developing research resources. The Board will also advise and assist the Director and Executive board in developing strategic plans to achieve its mission that responds to educational need both locally, nationally and internationally in the field of STEM education. The Advisory Board are considered advocates of the Center, promoting the work of the Center and establishing new associations with leaders in STEM education research and innovation.

The Advisory Board has historically been extremely helpful in advising the Director in planning the Center’s events and its operation more globally, particularly on realizing the scope and possibilities of how the Center can make an impact over time. Some advisors have also visited and assisted associates of the Center in their R&D programs, and hosted graduate students at their institutions.

**Research Scientists, Associates & Staff**

As part of the bylaws editing process, we revisited the Research Scientists, Associates, and Staff and decided to simplify the structure for associates of the Center. There are now three primary designations: Research Scientists, Visiting Research Scientists, and Research Assistants. They are described as follows:

a. Research Scientist: (1) a tenured or tenure-track faculty member at the University of Massachusetts Dartmouth, who is developing or executing a research, public service, or educational project under the auspices of the Kaput Center, or (2) a qualified professional practitioner, who is locally developing or executing a research, public service, or educational project under the auspices of the Kaput Center,

b. Visiting Research Scientist: (1) any faculty member at an accredited college or university, who is developing or executing a research, public service, or educational project related to the mission of the Kaput Center and will have a physical presence at the Kaput Center or (2) a qualified professional practitioner, who is developing or executing a research, public service, or educational project related to the mission of the Kaput Center and is visiting the Center. Visiting Research Scientists are expected to make a substantive contribution to the Kaput Center in collaboration with Center faculty and students. Appointment to the position of Visiting Research Scientist requires the approval of the Kaput Center Executive Board.

c. Research Assistant: (1) any PhD student accepted onto the Doctoral Program in STEM Education at the University of Massachusetts Dartmouth who is appointed as a Research Assistant to a Center-based grant-funded project.

These positions are two-year, renewable appointments.
Physical Layout & Equipment

The Kaput Center was moved to Room 114 in the LARTS building on the UMass Dartmouth campus in Fall 2019. While this move was important to move the work of the Center forward, it resulted in a dramatic reduction in space as well as liquidation of many of our older technologies. At the end of FY2020, the following technologies are housed in the Kaput Center:

- Several overhead projectors appropriate for use as needed
- 7 Apple Laptop computers for use in research projects and demonstrations
- iPads for use on research projects for use in research projects and demonstrations
- 6 Chromebooks for use in research projects and demonstrations
- 11 Photon Robots
- HD/DV cameras
- Wireless lavalier microphones
- 4 audio recorders
- Augmented reality sandbox
- A variety of common “Makerspace” technologies including Arduinos, robots, Makey Makey, and Raspberry Pis

Some of these materials are housed in the Kaput Center without being the property of the Kaput Center (e.g., the Augmented Reality Sandbox and the Photons), but they are available for use by any faculty or students affiliated with the Center.

Kaputcenter.org, our new website, went live in fall 2018. We own this URL for five years. The InterMath website conversion was also completed and we now own the intermath.org domain for five years.

In addition to the devices, the Kaput Center has a large library that supplements the Campus library facility and which includes a small sampling of journals and books relevant to STEM Education. The Center’s library includes journals and books focused on: Mathematics Education, Anthropology/Evolutionary Theory, Cognitive Psychology/Science, Representation theory, Computer Science and Design, Learning Sciences, Linguistics and Discourse Analysis, Complexity Theory, Mathematics, Philosophy, Socio-Cultural Studies, Curriculum Design, and Quantitative and Qualitative Methodology. The books are indexed in Libib, which makes it possible to see the holdings for the Kaput Center on the Web: https://www.libib.com/u/kaputcenter
Summary of Fiscal Activity
We report in detail here the Center’s main operational budget and not the revenue/cost structure of externally funded grants. Total operational budget for FY22 was $31,597 with operational expenses of $30,629.

Functional Areas of Operation

Research & Development

Addressing Mission Need: Provide a focus and support for sustained investigation of foundational issues in the field of mathematics education ...

The faculty and staff of the Kaput Center and their associates continue to conduct cutting-edge research in mathematics education focusing on the following core areas:

- Enhancing mathematical communication in K-16 classrooms
- Transforming teaching practice across districts
- Addressing the needs of all learners in STEM Education
- Teacher knowledge and teacher professional development
- District-wide improvement of mathematics and science teaching in elementary and middle grades
- Teaching and learning mathematics at the undergraduate level

There were five funded grants in the Kaput Center in FY22 with one addition grant funded and scheduled to start in August 2022:

CAREER: Analyzing the Nexus between Advantaged Social Positioning and Science Identity Development Among English Language Learners. This project was funded by the National Science Foundation with a start date of September 2017. This grant to Shakhnoza Kayumova explores how to support students in developing as STEM learners while they are also learning to speak English. The goal of the grant is to better support teachers to support students who are grappling with language acquisition.

Usable Measures of Teacher Understanding: Exploring Diagnostic Models & Topic Analysis as Tools for Assessing Proportional Reasoning for Teaching. This project is housed at University of Southern California with Yasemin Copur-Gencturk as the PI. Chandra Orrill serves as a Co-PI and as the lead project person at UMass Dartmouth. This is an NSF-funded project. In this project, we are creating an assessment of teacher knowledge for proportional reasoning. We aim to measure content knowledge (CK) and pedagogical content knowledge (PCK) using emerging psychometric models including Diagnostic Classification Models and Topic Models.

Advancing Middle School Teachers’ Understanding of Proportional Reasoning for Teaching. This is an IES-funded research grant housed at University of Southern California with Yasemin Copur-Gencturk as the PI. Chandra Orrill serves as a Co-PI and as the lead project person at UMass Dartmouth. In this project, we are attempting to create online professional development for proportional reasoning. We are focused on both the mathematical knowledge (CK) and the strategies teachers use to teach proportions (PCK). The resulting PD will be entirely online with a virtual facilitator and an assessment system that places teachers into submodules based on their abilities.
Computational Thinking Counts in Elementary Grades: Powerful STEM Teaching and Learning for the 21st Century. This NSF-funded research grant is led by Chandra Orrill (PI), with Shakhnoza Kayumova and Ramprasad Balasubramanian as co-PIs. The research team seeks to help elementary school teachers engage their students in computational thinking, the kind of thinking that computer programmers use. For example, students will be challenged to think about problem solutions in ways that would allow a computer to solve them; create solutions that require a series of ordered steps to carry out; identify, analyze, and implement solutions that are efficient, effective, and creative; and use models and simulations to represent data.

EAGER: SaTC AI-Cybersecurity - Opening Doors for Cybersecurity & AI: An Interdisciplinary Approach to Engaging Middle School Students. This NSF-funded grant is led by Chandra Orrill (PI) with Shakhnoza Kayumova and Pratim Sengupta (University of Calgary and Kaput Center Advisory Board member) serving as Co-PIs. We are exploring what middle school students should know at the intersection of cybersecurity and how we can support them in learning those things. To this end, we have developed a think tank comprised of cybersecurity researchers, cybersecurity and AI professionals, K-12 teachers, and educational researchers. We are looking at the big ideas this group developed to create a pilot unit of instruction for middle school students. We are also creating a survey for middle school students to be used as a baseline for determining what those students know about this area.

Funded, starting August 2022:
Title: Rational Numbers Playground: Applying and Refining a Model for Dynamic, Discussion-Based PD for Fractions, Ratios, and Proportions
PI: Chandra Orrill
Funding: National Science Foundation
Amount Requested: $980,175 for UMassD, $1.7 million total
Project Dates: 8/2022-7/2026
**Symposium & Colloquium Series**

Addressing Mission Need: The Center is an interdisciplinary research unit where fundamental problems in mathematics education will be studied, discussed and analyzed through conferences, interdisciplinary colloquium series ...

Our colloquium series returned in Spring 2022 as a series of four talks. All were offered online. Full abstracts of the talks can be found in Appendix B.

All of the past Colloquium talks are available on the Kaput Center YouTube channel and are accessible through the Kaput Center Website.

**STEM4Girls (Coming October 2022)**

With the reset due to the pandemic, the Kaput Center is taking the opportunity to move STEM4Girls to the fall. We believe that this timing will be better because schools, students, and faculty are all very busy in the spring. We have been able to schedule Dr. Megan Winten, a UMassD alum and Research Scientist at the Atlantic White Shark Conservancy as our keynote speaker. And, we have scheduled with STEAM the Streets to do a closing session for everyone. We are actively seeking volunteers to provide workshops and support for the efforts that day.

**Supporting the PhD Program**

Addressing Mission Need: The Center is an interdisciplinary research unit where fundamental problems in mathematics education will be studied ...

The Department of STEM Education and Teacher Development was able to start the STEM Education Ph.D. program in Fall 2018. The Kaput Center supports the program through the colloquium series. We also make available key Handbooks and other materials, such as the APA guide for writing papers. With our move to campus, we were able to use an ID reader to grant all of the doctoral students and faculty access to the Kaput Center any time they needed it, thus making the physical materials in the Kaput Center more accessible. Ph.D. students use these materials, such as video cameras and tripods, in their own research projects.

**K-12 Outreach**

In FY22, the Kaput Center engaged in minimal outreach, largely because of the continued presence of COVID. We have resumed our grant work in local schools, thus we are still impacting learners in the area.
Grant Proposal Activity

*Funded Proposals* (bolded names indicate Research Scientists in the Kaput Center)

**Title:** Usable Measures of Teacher Understanding: Exploring Diagnostic Models & Topic Analysis as Tools for Assessing Proportional Reasoning for Teaching  
**PI:** Yasemin Copur-Gencturk (Univ of Southern CA)  
**Subaward PI:** Chandra Orrill (PI on UMassD Subaward)  
**Co-PIs:** Allan Cohen (Univ of Georgia) & Jonathan Templin (Univ of Kansas)  
**Funding Agency:** National Science Foundation  
**Amount:** $2.1 million  
**UMass Dartmouth Award Amount:** $377,973  
**Project Dates:** 6/1/18-5/31/22

**Title:** Advancing Middle School Teachers’ Understanding of Proportional Reasoning for Teaching  
**PI:** Yasemin Copur-Gencturk  
**Subaward PI:** Chandra Orrill (PI on UMassD Subaward)  
**Co-PIs:** Benjamin Nye (USC), Allan Cohen (UGA)  
**Funding Agency:** Institute for Educational Sciences  
**UMass Dartmouth Award Amount:** $237,413  
**Project Dates:** 7/1/18-6/30/22

**Title:** CAREER: Analyzing the Nexus between Advantaged Social Positioning and Science Identity Development Among English Language Learners  
**PI:** Shakhnoza Kayumova  
**Funding Agency:** National Science Foundation, CAREER program  
**Amount:** $779,000  
**Project Dates:** 9/1/2017-8/31/2022

**Title:** Computational Thinking Counts in Elementary Grades: Powerful STEM Teaching and Learning for the 21st Century  
**PI:** Chandra Orrill  
**Co-PIs:** Shakhnoza Kayumova & Ramprasad Balasubramanian (Computer Science)  
**Funding Agency:** National Science Foundation  
**Amount Requested:** $2,116,315  
**Project Dates:** 1/1/20 – 12/31/23

**Title:** EAGER: SaTC AI-Cybersecurity - Opening Doors for Cybersecurity & AI: An Interdisciplinary Approach to Engaging Middle School Students  
**PI:** Chandra Orrill  
**Co-PIs:** Shakhnoza Kayumova, Pratim Sengupta  
**Funding:** National Science Foundation  
**Amount:** $299,483  
**Project Dates:** 9/1/2021-8/31/2023
Funded, starting August 2022:
Title: Rational Numbers Playground: Applying and Refining a Model for Dynamic, Discussion-Based PD for Fractions, Ratios, and Proportions
PI: Chandra Orrill
Co-PIs: Rachael Brown (Penn State Abington) and Allan Cohen (University of Georgia)
Funding: National Science Foundation
Amount Requested: $980,175 for UMassD; $1.7 million total
Project Dates: 8/2022-7/2026

Declined Proposals:
Title: Collaborative Research: CS through STEM RPP - Engaging Teachers in a Pedagogical Shift to Broaden CS Education in Middle School
Co-PIs: Robert Gegear, Shakhnoza Kayumova (subaward with WPI as lead institution)
Funding: National Science Foundation
Amount Requested: $338,697
Project Dates: 9/2022-8/2025

Title: Kids Engaged in Environmental Literacy (KEEL)
Co-PIs: Stephen Witzig, Katherine Kavanagh
Funding: National Science Foundation
Amount Requested: $299,968
Project Dates: 7/2022 – 6/2024

APPENDIX B

Abstracts of Symposium & Colloquium Series
Computational Science as a Complex, Ethical-Political Pivot in STEM Education
Dr. Pratim Sengupta
Professor of the Learning Sciences, University of Calgary
March 2, 2022

Abstract: In this talk, I will focus on how attending to relationships between discipline, ethics and politics can shape both practice in STEM fields and praxis in STEM education. I will argue how the design of computational models of complexity can be seen as both heterogeneous and ethical endeavours, and consider potential re-orientations for teacher preparation and public education. I will outline how such approaches may center axiological concerns for both what count as “disciplinary phenomena” and “disciplined interpretation”, and how such re-orientations can be taken up in our praxis as community-engaged education scholars.

E-Textiles in Schools: Curriculum, Teaching, and Results of Putting Making in Computing Classrooms
Dr. Deborah Fields
Associate Research Professor of Instructional Technology & Learning Sciences, Utah State University
March 25, 2022

Abstract: In this talk, Deborah Fields shares about the multi-year development, implementation and results of a ten-week long curricular unit, “Stitching the Loop,” which integrates electronic textiles with computer science in schools around the country. Electronic textiles use conductive thread to connect sewable LEDs, microcontrollers (e.g., LilyPad Arduino, Adafruit Circuit Playground), sensors and other inputs and outputs onto fabric or similarly soft media. Consciously combining traditionally classed and gendered activities such as engineering, computing, crafting and sewing disrupts students’ and teachers’ preconceptions about who can create with computing, engineering, and crafting. The curriculum is situated within Exploring Computer Science (ECS), an equity-focused and inquiry-based year-long introductory computer science course taught in public high school classrooms all over the country. The curriculum seeks to broaden access to both making and coding, deepen learning in both fields, and promote better diversity in what is being made. Research on implementation of the curriculum has demonstrated strong gains in student interest, sense of competence and growth mindset with computing as well as learning gains in computation, problem solving, and computational communication. We will discuss the development and research on the curriculum and share about more qualitative findings about equity-minded teaching practices, peer collaboration, and the important role of aesthetics in students’ learning.
(Re)Examining Assumptions
Dr. Zandra de Araujo
Chief Equity Officer & Math Principal, University of Florida’s Lastinger Center for Learning
April 8, 2022

Abstract: Humans make assumptions. Many times, these assumptions may be passed along and turn into powerful narratives, whether true or not. In this talk I’ll look at some assumptions we have in mathematics education and the ways in which my research has caused me to rethink these assumptions. In particular, I’ll focus on my research with students classified as English learners, teachers using flipped mathematics instruction, and professional learning opportunities for teachers.

The Bio-CS Bridge: A Transdisciplinary Team Approach to Integrating Biology and Computer Science in High School Curricula
Dr. Robert Gegeär
Assistant Professor of Biology, UMass Dartmouth
April 29, 2022

Abstract: Pollinators are declining at an unprecedented rate worldwide for unknown reasons. These declines pose a significant threat life on our planet due to the critical role that pollinators play in maintaining ecosystem health and biodiversity. The Beecology citizen science research project aims to improve pollinator conservation efforts in North America through the rapid collect of ecological data on species at risk. I will discuss how the Beecology Project is being used to create a fully integrated STEM+C high school curriculum (the BIO-CS Bridge) that combines scientific practices such as experimental design and hypothesis testing with computational thinking and skills such as modeling, simulation, and systems approaches to biology. I will also highlight and demonstrate some of the freely available BIO-CS Bridge educational tools that we have developed for teachers, which include a mobile webapp, computer simulations, online data visualization tools, and other online resources. This work provides a blueprint for the use of transdisciplinary team science to develop highly effective integrated curriculum in many content areas.
